SKILLS

Fronend: HTML Ι CSS Ι Javascript Ι Tailwind CSS Ι React Js Ι Next Js
Backend: Node Js Ι Express Js Ι Java Ι MongoDB Ι Mongoose
Tools: Git Ι Firebase Authentication Ι VSCode Ι React Router

EXPERIENCE

Next.js Developer Intern
EdupyBD | November 2024 - January 2025

1. Developed and maintained scalable **full-stack** applications using **Next.js, Node.js, and Express.js** with **TypeScript**.
2. Implemented **server-side rendering (SSR) and API routes** in Next.js for improved performance and SEO.
3. Contributed to **project documentation**, ensuring clear guidelines and efficient collaboration.
4. Assisted in developing **cadet course projects**, optimizing backend logic and improving frontend performance.
5. Worked with **React, Tailwind CSS, Firebase Authentication**, and PostgreSQL/MongoDB for a seamless user experience.

PROJECTS

Stay Zen | Hotel Booking Web Application   Project Frontend Backend

Deliver a visually captivating user interface for hotel room bookings,enhancing user engagement with personalized booking management through 'My Bookings'.
Features-
1. Dynamic Interaction: Real-time updates, flexible date modifications, and authentic user reviews.
2. User-Centric Reviews: Authentic user testimonials, ratings, and an interactive review system.
3. Efficient Booking Management: Booking cancellations with a time restriction, allowing users to cancel reservations before 1 day from the booking day.
Technologies: React Js,Firebase,Tailwind css,Daisy UI,Moment js,jwt,Node js,Express js,Mongodb

Byte Blitz | Tech Product Discovery Platform   Project Frontend Backend

Discover and engage with the latest tech products on our platform, featuring an interactive system for users to upvote, submit, and explore innovations.
Features-
1. Role-Based Access Control:Tailor user experiences with distinct roles for Normal Users, Moderators, and Admins.
2. Integrated Payment System:Elevate your tech journey with premium subscriptions, unlocking advanced features and exclusive content.
3. Interactive User Reviews:Engage with the community through interactive user reviews, fostering discussion and providing valuable insights for each tech product.
Technologies: React Js,Firebase,Tailwind css,Daisy UI,Axios,Tanstack query,React hook,Node js,Express js,Mongodb.

Libra Byte | Library Management System | Team project   Project Frontend Backend

LibraByte: Revolutionizing Library Management with Comprehensive Features including Book Borrowing, Dashboard, and Blog Integration.
Features-
   LibraByte offers a comprehensive library experience with dynamic features such as curated book displays, real-time dashboard metrics, upcoming book previews, chatbot support, subscription services, user and librarian dashboards, book borrowing and wishlist management, community-driven reviews and requests, PDF downloads for subscribers, book donations, and secure login and registration processes.

My Contribution
 I've developed three key features:

    1.All Books Page: Users can explore available books, get personalized recommendations, and navigate genres easily.

    2.Borrow Book: Conveniently request to borrow books with specified return dates.

    3.Add to wishlist: Create and manage a personalized list of books for future borrowing.

I've contributed in another two features:Membership,Donation.

Technologies: Next Js,Firebase,Tailwind css,Daisy UI,Axios,Tanstack query,React hook,Node js,Express js,Mongoose.
